

**Governor's Workforce Development Board (GWDB) Industry Sector Councils
Construction**

Office of Workforce Innovation (OWINN)

*****MEETING MINUTES*****

Name of Organization: Governor's Workforce Development Board (GWDB) Industry Sector Council (NRS 232.935 requires the GWDB to establish industry sector councils)

Date and Time of Meeting: August 3, 2017 - 9:00 – 10:30 A.M.

Place of Meeting: Grant Sawyer Building, Room 4412
555 E. Washington Avenue, Las Vegas, NV

Note: Some members of the Council may be attending the meeting and other persons may observe the meeting and provide testimony through a simultaneous videoconference conducted at the following locations:

Legislative Building, Room 2134
401 S. Carson Street, Carson City, NV

Great Basin College, Room #102, McMullen Hall
1500 College Parkway, Elko, NV.

ATT Teleconference Line: 888-363-4735

Access Code: 9319340

Council Members Present: William “Bill” Stanley, Wayne Laska, Greg Dye, Roy D. Clark

Council Members Absent: Jeff Wagner, (excuse), Michael Russell, (excuse), Lance Semenko, (excuse)

Others Present: Manny Lamarre (OWINN), Joan Finlay (OWINN), Zachary Heit (OWINN), John Wiles (UCIC)

**Please note that all attendees may not be listed above.*

I. CALL TO ORDER

William “Bill” Stanley, Chair

Bill Stanley, called the meeting to order at **9:09 a.m.**, welcoming sector council members and members of the public. After welcoming everyone and thanking them for attending the meeting, Chair then asked for Mr. Lamarre to start the introduction.

II. INTRODUCTIONS

Manny Lamarre, Executive Director, OWINN

Manny Lamarre introduced and welcomed Greg Dye, General Manager and licensed officer for Briggs Electric, Inc., in Carson City, Nevada. His primary duties include safety, customer services, business development operations, labor relations, and executive supervision for all major projects handled by the Nevada office. Having started his career in the industry as an apprentice, he has worked at many different facets of the trade and worked his way up through the ranks as a manager and business owner. Greg worked for Briggs Electric in California for 12 years before moving to Nevada in 1993 and starting his own general electrical contracting business out of his garage. He successfully grew the business before returning to Briggs Electric to run their Nevada office for the last 21 years. Greg is active in supporting the electrical industry, construction trades and select local causes through his involvement as Chairman of the Local Electrical Apprenticeship program as a NECA Board Member and through his affiliations with AGC, NNDA and many other industry groups. Briggs Electric is currently one of the largest Electrical Contractors in Nevada with over 450 employees and the largest employer of Electrical apprentices in Northern Nevada. OWINN would like to welcome Greg as a new member of the Construction Industry Sector Council.

Manny Lamarre “Thank you to everyone again for their valuable time. The first round of meetings last year were around identifying the in-demand occupations. The outcome was very concrete in that we were able to identify the in-demand occupations for each industry sector, which then helps drive alignment, particularly with K-12 career technical education and a publicly funded workforce system. Those in-demand occupations have now been inserted in various policies around alignment. The concept of this meeting and several meeting moving forward will be around identifying industry recognized credentials and certifications.”

Hearing no other comments, the Chair closed the session and proceeded to the next agenda item.

Chair Bill Stanley then asks Ms. Finlay to call roll and verify that a quorum was present.

III. ROLL CALL – CONFIRMATION OF A QUORUM

Joan Finlay, Executive Assistant, OWINN

Joan Finlay called roll and informed the Chair that a quorum was present.

IV. VERIFICATION OF POSTING

Joan Finlay, Executive Assistant, OWINN

Ms. Finlay affirmed that the notice and agenda for this August 3, 2017, GWDB Construction Industry Sector Council Meeting was posted according to Nevada's Open Meeting Law pursuant to NRS. 241.020.

V. PUBLIC COMMENT(S)

(Public Comment will be taken during this agenda item regarding any item appearing on the agenda. No action may be taken on a matter discussed under this item until the matter is included on an agenda as an item on which action may be taken. The Chair will impose a time limit of three minutes. Public Comment #2 will provide an opportunity for public comment on any matter within the Chair's jurisdiction, control or advisory power.)

The First Public Comment Session was announced by the Chair, and after reading the statement above into the record, the public was invited to speak. No comments were made. Hearing none, the Chair closed the session and proceeded to the next agenda item.

VI. APPROVAL OF PRIOR MINUTES AND AGENDA (Information/Discussion/For Possible Action)
Bill Stanley, Chair

Bill Stanley asked the Council members if they had an opportunity to review December 9, 2016, GWDB Construction Industry Sector Council Meeting Minutes. A motion was made to approve the minutes and the agenda by Wayne Laska. It was seconded by Roy D. Clark. All were in favor; none were opposed. The motion was carried unanimously.

VII. LABOR MARKET OVERVIEW (Information/Discussion)
Christopher Robison, Supervising Economist, Research & Analysis Bureau, DETR

Christopher Robison thanked everyone for their attendance. He continued, "As many have mentioned earlier, you are focusing primarily on the credentials today, but we wanted to give you just a quick update on the current state of the labor market and where we see things going in the future, as well as to solicit a little bit of feedback on your particular sector. The Recovery Score Card, that in the PowerPoint, basically, it's a general overview talking about where we were at the bottom of the recession and where we've come since then. Nevada has added over 230,000 jobs since we bottomed out in the recession back in 2010. Regarding unemployment, we have gone from an unemployment rate of 13.7% at the peak down by nine full percentage points to 4.7%. Therefore, we are showing significant improvement there."

"Regarding small businesses, over 100,000 small business jobs have been added. We also have a record high number of employers, and our average weekly wage has finally started to rise a little bit, and the average currently is close to \$900 per week. That is one of the areas that has been fairly soft on the recovery and slow to come about, but we are finally starting to see a little bit of movement there. In terms of overall growth, Nevada is the fourth fastest growing private sector in the nation, so we are doing pretty well right now."

Mr. Robison continued to talk about labor force participation rate. "This is the percentage of your population that are engaged in the labor market, and what we see here are declines in the labor force participation rate and since about 2009-2010. This trend is being seen nationwide, but it is a little bit more significant in Nevada right now. We are dropping faster than the nation, and we are continuing to drop even though the nation has leveled off. This is both due to structural and cyclical forces. One of the major things that we see affecting it right now is retirement from the baby boomer generation. That is affecting participation rates, but wages is also one of the other factors that have been affecting this quite a bit. There is still quite a lot of part-time work out there, wages are still fairly low, and there are still quite a few people that have not been enticed to re-enter the labor force at this point. Even with the labor force participation rate dropping, we have seen pretty strong growth regarding total employment. Employment exceeded 1.34 million for the first time on record that beats our pre-recessionary peak of 1.3 million back in 2007-2008."

“The state unemployment rate, as mentioned earlier, has reached a rate of 5.7%. This is down from 5.7% a year ago and 13.7% at the top. Regarding absolute unemployment, we are at about 67,900, which is off from a high of 186,500 at the peak of the recession.”

State Employment (SA)

- Non-Farm Job Levels Up 48,700 Relative to a Year Ago in June
 - Strongest since last September; another record-high
 - 78 consecutive months of year-over-year gains
 - 3.8% gain compares to 1.6% in the nation
 - 59 straight months in which Nevada > U.S.

- Up 10,600 Over the Month
 - 800 (NSA²) jobs were expected to be lost based upon historical trends, but 9,800 jobs were actually added, resulting in the seasonally adjusted increase
 - Considerable month-to-month volatility of late

“In the next meeting when we talk about demand occupations again, we'll be updating the projections and updating that demand occupations list. As part of that process, we would like to receive some industry feedback about where you see things going, if there are any major changes that you see happening in the hiring structure or growth structure over the next year or two. Think about this for next time - is there any particular occupation or part of the industry that you see being substantially different from last time we talked to you? You can email me later, or if you want, just to give a bit of feedback is welcome.”

Mr. Dye commented that they expected to see some growth in the middle part of 2018 due to increases residential and commercial business stabilizing, and the effect of Apple and Tesla in Reno.

Mr. Stanley mentioned that in the future meetings it would be very helpful if Mr. Robison could break down employment numbers in the construction industry based on the different classifications such as highway versus commercial versus residential, etc.

VIII. NV INDUSTRY RECOGNIZED CREDENTIALS BLUEPRINT & LIST (*Information/Discussion/For Possible Action*)

Manny Lamarre, Executive Director, OWINN

Manny Lamarre presented an overview of the PowerPoint in more detail about how industry recognized credentials are defined and identified. Manny talked about how AB 482, a workforce bill concerning career technical education (CTE), is in statute and was signed by the Governor in May 2017. Grants will be awarded according to criteria adopted by the Board of Education upon the recommendations from the state's Industry Sector Councils.

We are taking the work from the Sector Councils and aligning their programs based on the information. Manny talked about three main tasks for the Sector Councils:

- Identify in Demand Occupation
- Identify Credentials
- Identify Skill sets

There are a variety of strategies when it comes to workforce development. In order to upgrade or provide a skilled workforce, identifying certifications or credentials is an important part. So I'll speak on this a little bit within the context OWINN's key strategies. Our new infographic outlines our key strategies and policies:

- One is affecting workforce policies. That means just whether they're supporting the Governor's office and the publicly-funded workforce system around designing policies.
- Two is designing career pathways. That work is primarily led by the Governor's Office of Economic Development, GOED, around these targeted industry sectors where we're developing pathways.
- Three is around scaling apprenticeships. An apprenticeship is a core aspect regarding workforce development, and we want to work to scale apprenticeship programs throughout the state.
- Four is leveraging labor market data and insight, and that last one's really cored to the work that you all do as Sector Council Members. Again, when we identify these in-demand occupations, there is a concrete output regarding aligning and working with the publicly funded workforce systems to nudge the system to move in that direction.
- Five is validating industry recognized credentials, which is the context of our conversation now.

Mr. Lamarre continues to ask “What is a Credential? Whenever you hear the term credential, sometimes it gets quite confusing, and people use other terms synonymously, but essentially in layman's terms, there are four buckets of categories that fall under the umbrella of credentials.

1. Educational diploma or degree, associates or bachelors and so forth.
2. Occupational state license, so a state license falls under the term credentials.
3. Industry certification
4. Certificate or an examination.

So those are the four things that fall under the umbrella of industry-recognized credentials.

For the context of today's conversation, we're focusing on the third and fourth bucket, which is around certification, certificate or an examination. So, we're not specifically focusing on the license, or a diploma, or education in the traditional sense.

Now, when we think about what are the characteristics of a quality credential, you all probably know this in the industry intuitively, but being a bit more specific:

- One is that the industry recognizes them. So to some extent, individuals in the industry said it is important and it is valid.
- Two, it has a labor market value by employers or industry; credential addressed economic needs and linked to demand-driven occupation in the state.
- Three, they're stackable, so obtaining one certification doesn't mean you're set for life. As you all know, it's a constant ongoing process of upgrading your skill set, and sometimes that can mean attaining a new certification that stacks up against each other.
- Four, that they're portable, meaning that, quite frankly, if someone gets a certification it doesn't mean that if you move to a different region or a different state, and many times even a different country, they're nationally or internationally recognized.
- Five is that there's a quality/accredited aspect to it. There's a lot of the work we're doing on the back end to ensure that when an issuing agency says "This is a certification of value" there is some quality assessment to it.
- Six is that the credential is linked to a career technical education program of study, that there's an alignment.

Mr. Lamarre asks “Why should we focus on credentials? We've had this conversation in our last round of meetings, at least anecdotally, but we've also been, or at least OWINN's been on a soap box talking about this. When we think about K-12 post-secondary alignment, when we speak to young adults 16-29, there's a misconception about what it takes to be successful. Most young adults will say, actually when we did a statewide survey, you need to go directly from a high school to a four-year degree to be successful, and we know that's not the case. A statewide survey of young adults our office conducted confirmed this notion. So, 51% of all jobs in

Nevada are middle-skill jobs. And middle-skills means you need more than a high school but less than a four-year. And this is a perfect place where certifications come in.

We want individuals in the workforce system, young adults and adults as well to know there are other avenues to a strong career outside of obtaining a four-year degree. That there are equally relevant and respected options. So, we're trying to push that narrative. And you'll see some of the other data points essentially that affirm this. Whether you look at targeted in-demand occupations or overall occupations statewide, most of them are middle-skill and require more than high school diploma but less than a four-year degree, and certifications fit in that box as well."

Quite a few of the states have been working to validate industry recognized credentials such as Florida, Kansas, Louisiana, and Virginia. Essentially, how their work is different from what we're doing is that in their context, the work of certifications only sits within the Department of Education and its Career Technical Education Department. One of the things that we're doing differently is by engaging the Sector Council, engaging folks in industries, because if we're saying something is an industry-recognized certification, we should be engaging focus groups, stakeholders, staff in the industry that say "Yes, these are certifications we've heard of and we think are valuable."

A few states, such as Virginia, talked about how they're paying two-thirds of the cost for all high school students to obtain certifications. In Nevada, one of the unique things is that after this last legislative session, the Department of Education will pay for 100% of the cost. If a high school student pursues a certification while in high school, they'll pay for that.

Mr. Lamarre continued to talk about leveraging the work of other states and working with industry and the public workforce system to identify some key certifications and credentials that we can really get folks on board to begin a career path. He continued, "Because you all are industry leaders, we kind of know the different pathways, but the average person in the community might not know where to start and this will at least begin that conversation.

SB 516, which I'll explain in much further detail in another agenda item, was passed in the last legislative session. In Section 20, it requires OWINN, in consultation with the industry, to identify recognized credentials.

AB 7 allows the State Board of Education to prescribe the form of pathways for a high school student. It allows the Department of Education to endorse college and career pathways within your diploma. So, students can pursue a certification and it will count toward their high school diploma. If a student wants to go through a registered apprenticeship program, or if they want to pursue A++, or whatever certification is identified in healthcare, that will count towards their high school diploma. So, we do think that's a way to be very concrete and push that narrative, so students know there are a variety of pathways to be successful.

There are a few other really important concepts that we quote whenever we talk about quality criteria.

- They meet national quality standards,
- They are recognized by a third party,
- Support improved employment prospects and
- Add some value to the labor market.

Another reason for having industry validate certifications or credentials is that we may have community members who get a credential around something that they think is valuable but it actually has no value. As a result, they essentially wasted their money and resources. So, all of the certifications would meet those quality criteria to ensure they are valuable and recognized by industry.

The first step in the process to validating industry recognized credentials is for OWINN to identify an initial list of credentials, and by credential, in this context, we're talking about certification, so not a diploma, not licenses, just certifications or certificates. In some instances, we may want to convene working groups informally, just to have a conversation around the certification. One example is IT. IT is huge and vast, similar to healthcare, so we just have been meeting with folks informally to say "Hey, what are some certifications?" And then doing some analysis with that.

Once that initial list is compiled, we take it to the Industry Sector Councils, and they provide us some examples and confirm or reject the credentials on the initial list. We're just trying to find some initial certifications that we can nudge the public workforce system and individuals toward in pursuing a career pathway. After the Sector Councils approve a list of credentials valued and recognized in their industry, that approved list of credentials is taken to the Workforce Board for a final vote.

What we are asking our current Sector Council members to do, again, is provide us with some insight from your industry. This list here that I have, these are samples. When we look at other states, for example, Virginia or Florida, these are credentials that they have listed on their website and that their students also can pursue. And all of those certifications meet the national standards.

However, what's unique and what's different and what's more rigorous about our process is that we're not just stamping a list of certifications online and telling the students to pursue them. We want to make sure that within your field of work, that you've even heard of some of these certifications. Or maybe you want us to get rid of all of these certifications and recommend others. So, we'll just open it up to the discussion around any of these certifications that you believe have merit. Maybe also in some other context, in other councils, they say let me take a week or two to get back to you and think of some lists, then we have individual conversations and then we convene the group again to vote on it. Again, these are samples and we would love everyone's feedback and pushback around these samples, and whether to add to or subtract from this list.

Bill Stanley asked Mr. Lamarre, "Is there a nexus design to this process and this funding? Specifically, the WIO funding, how does that money flow out beyond the scope of this group and others? What is your vision for targeting some of that funding toward an individual that will be able to engage into this credential process that will lead to a path for us in the construction industry?"

Manny Lamarre responded, "OWINN is working on a massive analysis of workforce funding. In specific regard to the credential, we want to be able to analyze and tie funding to the outcomes. We want to be able to see that public workforce dollars are contributing to credentials and jobs. The reason why this conversation has not been robust yet is that we have not had a list of approved credentials yet."

Bill Stanley "We do not want to put an individual on a credential path that does not lead to a job or is not recognized by employers."

Manny Lamarre stated, "We talk about the market value data and supporting skill attainment. Once we identified this initial draft, the next step is to convene with sector council members as a working group, to discuss the list as needed, and then take it to the Industry Sector councils for review and approval. The list will be based on their respective industry. Once industry sector councils approve the list, then the final step would be sent to the Governor's Workforce Development Board for their approval. Once approved, we then take it to the Nevada Department of Education (NDE) to adopt the list of credentials."

Bill Stanley thanked Mr. Lamarre. "We need to hear input from the more industry-specific experts that we have on the board. I can see that we'll have to go over this a bit, take some time and get back on it. And please, I'd like to see if the other members of the board would like to chime-in."

Manny Lamarre mentioned that this initial list is a draft and can be amended by adding or subtracting some of the credentials on the list. The target is entry-level certifications for secondary students or adults that are

transitioning into the workforce system, i.e. dislocated workers, veterans, etc. Lamarre provided the option that his office could send sector council members a blank template and have them connect with other folks in the industry to gather their own list of recognized credentials valued by their companies. Members would then send their lists back and OWINN would synthesize them and send it back out to everyone, so the next time the council could actually vote on it.

Bill Stanley “I think that that's the path we ought to take, we all commit to getting back to Manny within the next two weeks, and either adding to or striking off of this list. If you' have experience with the individual certifications, maybe with the authorities that are granting these certifications. I don't think that I see anything like that on here, but it'd be a good thing to look at and think about.”

Manny Lamarre will follow-up and send this list again and send a blank template electronically. Members can cross out and scan and send back to OWINN, or you can add in a few certifications. We'll set a two-week deadline from today. Once the lists are received and synthesized, the council will be convened. The council could do this just by a phone call as long as there is a quorum, where members can vote on the list that was sent out.

IX. 79th LEGISLATURE POLICY SUMMARY *(Information/Discussion)*

..... Manny Lamarre, Executive Director, OWINN

Manny Lamarre “We have provided you all with a summary document that says, “Outline of Key Legislative Bills for Workforce 79th Legislative Session”. This list of workforce bills was passed during the 79th legislature session that I think are relevant. Here is some context around some of the work we're doing around workforce development.

Senate Bill - SB19 is a bill on dual credit. This bill was brought about by the Governor's office. The bill expands dual credit to allow high school students to get access to college courses. It's a workforce measure because, for example, there are workforce training programs for which a student can start taking a full secondary course and then get credit for it.

Senate Bill - SB 66 is a bill that expands work-based learning opportunities for students by removing the limitation on the amount of credit a pupil may earn for successful completion of certain work programs. School districts, charter schools, and nonprofit organization may also apply for grants from NDE to develop and implement work-based learning programs. This is important because we know students need opportunities to be in the field or to have internships to obtain essential work experience.

Assembly Bill - AB 7 is a bill from the Department of Education and allows the department to describe the pathways for high school graduation. Essentially, it's an endorsement to allow the Department of Education to allow students, for example, to pursue certification while in high school. It also provides for the creation of a college and career ready high school diploma.

Senate Bill - SB 516 is the bill that made our office, OWINN, a permanent office within the Governor's office. I mentioned this bill earlier as it describes the work that we're doing today regarding the validation of industry recognized credentials. We are a coordinating body with K-12 education, higher education, the employers, and the publicly funded workforce system as well as the Governor's Office of Economic Development, around identifying in-demand occupations and industry recognized credentials.

In addition to the work with the Industry Sector Councils is expanding and scaling registered apprenticeship programs. The process is similar in that our office is working with stakeholders in supporting the expansion of apprenticeship. Our office is the State Apprenticeship Agencies (SAA) which went into effective July 1, 2017. All state apprenticeship programs get approved through the State Apprenticeship Council. OWINN will now oversee all aspect of the State Apprenticeship Council. The State Apprenticeship Council used to be

administered by the Nevada Labor Commissioner's Office, but that responsibility now lies with OWINN. The Governor will appoint new members for the State Apprenticeship Council which will meet quarterly to approve programs. We are looking for diverse representatives from different industries to sit on the council. The State Labor Commissioner Office has been doing an excellent job of scaling apprenticeship. Through research and observation of other states or countries, apprenticeship can be used in all industries. Essentially when you're trying to create a registered apprenticeship program, you take the program's standards to the council and the council reviews and approves the apprenticeship program. The program is then registered with the Department of Labor.

X. PUBLIC COMMENT

(Public Comment will be taken during this agenda item regarding any item appearing on the agenda. No action may be taken on a matter discussed under this item until the matter is included on an agenda as an item on which action may be taken. The Chair will impose a time limit of three minutes. Public Comment #2 will provide an opportunity for public comment on any matter within the Chair's jurisdiction, control or advisory power.)

The Chair announced the Second Public Comment Session and invited members of the public to speak. None Comments was made:

XI. ADJOURNMENT (Information/Discussion)

Bill Stanley, Chair

The Chair adjourned the meeting at 10:16 a.m.

Agenda items may be taken out of order, combined for consideration by the public body, and/or pulled or removed from the agenda at any time. The Chair may continue this meeting from day-to-day. Pursuant to NRS 241.020, no action may be taken upon a matter raised during a period devoted to comments by the general public until the matter itself has been specifically included on an agenda as an item upon which action may be taken.

NOTE (1): Persons with disabilities who require special accommodations or assistance at the meeting should notify Joan Finlay, OWINN, between the hours of 8:00 a.m. through 5:00 p.m., in writing at 555 East Washington Ave, Ste. 4900; or call (702) 486-8080 on or before the close of business, Friday, August 4, 2017.

NOTE (2) Agenda items may be taken out of order, combined for consideration by the public body, and/or pulled or removed from the agenda at any time. The Chair may continue this meeting from day-to-day. Pursuant to NRS 241.020, no action may be taken upon a matter raised during a period devoted to comments by the general public until the matter itself has been specifically included on an agenda as an item upon which action may be taken.

NOTE (3) All comments will be limited to 3 minutes per speaker. Comment based on viewpoint may not be restricted. No action may be taken upon a matter raised under the public comment period unless the matter itself has been specifically included on an agenda as an action item. Prior to the commencement and conclusion of a contested case or quasi-judicial proceeding that may affect the due process of individuals, the Board may refuse to consider public comment. See NRS 233b.126

NOTE (4): Please provide the secretary with electronic or written copies of testimony and visual presentations if you wish to have complete versions included as exhibits with the minutes.

NOTE (5) Supporting public material provided to members for this meeting is posted on OWINN's website at gov.nv.gov/OWINN/ and may be requested from the Governor's Office of Workforce Innovation (OWINN) at 555 E. Washington Avenue, Ste. 4900, Las Vegas, Nevada 89104 or by calling Joan Finlay at 702-486-8080.

NOTE (6) THIS AGENDA HAS BEEN POSTED NO LATER THAN THREE WORKING DAYS PRIOR TO THE MEETING AT THE FOLLOWING LOCATIONS:

Notice of this meeting was posted at the following locations on or before 9:00 a.m. on the third working day before the meeting: DETR, 2800 E. St. Louis, Las Vegas, NV; DETR, 500 East Third St., Carson City, NV; DETR, 1325 Corporate Blvd., Reno NV; NEVADA

JOBCONNECT, 3405 S. Maryland Parkway, Las Vegas, NV; NEVADA JOBCONNECT, 4500 E. Sunset Road, Henderson, NV; NEVADA JOBCONNECT, 2827 N. Las Vegas Blvd., North Las Vegas, NV; NEVADA JOBCONNECT, 1929 N. Carson St., Carson City, NV; NEVADA JOBCONNECT, 172 Sixth St., Elko, NV; NEVADA JOBCONNECT, 480 Campton St., Ely, NV; NEVADA JOBCONNECT, 121 Industrial Way, Fallon, NV; NEVADA JOBCONNECT, 475 W. Haskell, #1, Winnemucca, NV; NEVADA JOBCONNECT, 4001 S. Virginia St., Suite G, Reno, NV; NEVADA JOBCONNECT, 2281 Pyramid Way, Sparks, NV; GRANT SAWYER OFFICE BUILDING, 555 E. Washington Ave., Las Vegas, NV; LEGISLATIVE BUILDING, 401 S. Carson St., Carson City, NV; NEVADAWORKS 6490 S. McCarran Blvd., Building A, Unit 1., Reno, NV; WORKFORCE CONNECTIONS, 6330 W. Charleston Blvd., Las Vegas, NV. This agenda was also posted on DETR's Web site at www.nvdetr.org. In addition, the agenda was mailed or e-mailed to groups and individuals as requested.
