

NEVADA ELIGIBLE INDUSTRY CREDENTIALING LIST

OBJECTIVE:

The state seeks to identify industry-recognized credentials that meet national quality standards, are recognized by third parties, support improved employment prospects, and have market value. While a credential does not guarantee employment the state’s vetted list of credentials will help protect students and adults transitioning into the workforce from poor quality credentials and promote credentials that can assist Nevadans in securing employment by providing evidence of skills and information on entry points into relevant industries.

TARGET AUDIENCE:

Entry level certifications that secondary students or adults transitioning into the workforce could prioritize (i.e., dislocated workers, veterans, adult education, etc.) when seeking workforce support.

LEGAL AUTHORITY:

[Senate Bill 516](#), passed by the 79th legislature and signed into law by Governor Sandoval in 2017 establishes the [Office of Workforce Innovation for a New Nevada](#) (OWINN). Section 20 (d) directs OWINN, in consultation with the Governor’s Workforce Development Board to “...identify industry-recognized credentials, workforce development programs and education...” The [Workforce Innovation and Opportunity Act](#) (WIOA) also gives priority consideration to training that leads to industry-recognized credentials. Furthermore, AB 7, also passed during the 79th legislative session, provides for the state board of education to adopt regulations that prescribe the criteria for a pupil to receive a college and career ready high school diploma; and, provides for the state board of education to prescribe the criteria for a pupil to obtain a college-ready endorsement and/or a career-ready endorsement on his/her diploma that is established so that it is recognized and valued by industries and postsecondary educational institutions.

TARGETED INDUSTRIES:
